

LETTER OF RECOMMENDATION

Subject: Recommendation of AMTEST-TM Kft / Hungary

Knorr-Bremse as the world's leading supplier of commercial vehicle air brake systems have to ensure the continuous improvement by attain success in Resource and Development. Therefore the R&D Test Laboratory established in Kecskemét, is stand for working with only high quality equipment and subcontractors with abilities like that. According to the past years experiences, which shows higher customer expectations and need for development expansion (new materials, and new testing conditions) we really do foresee a mutually beneficial cooperation with **AMTEST-TM** Company.

Thanks to their expertise and experiences, we can equip our test laboratory with the most suitable and adequate devices (professional environmental test devices: e.g. climatic test chambers, vibration test machines, salt spray test chamber and control software as well) which were assisting very much in our business and technical success.

Kecskemét, 2009.11.24

Gábor Ratatics

Leader of R&D Testlaboratory
